

With companies around the world all trying to find a cure for COVID-20...

...and racing to release one vaccine or another

People paid Millions of Dollars on Medical and Genetic researchers and specialists

My team was tasked with finding the cure, but, our Journey has proved difficult

Each batch after another failed to pass the Incubation test thus dying before it couldn't combat the virus sample.

We believed our efforts were for nothing

That is until.....

CRASH!!!!!!

*Could-Could
this be....?*
